

Django REST framework 系统组成

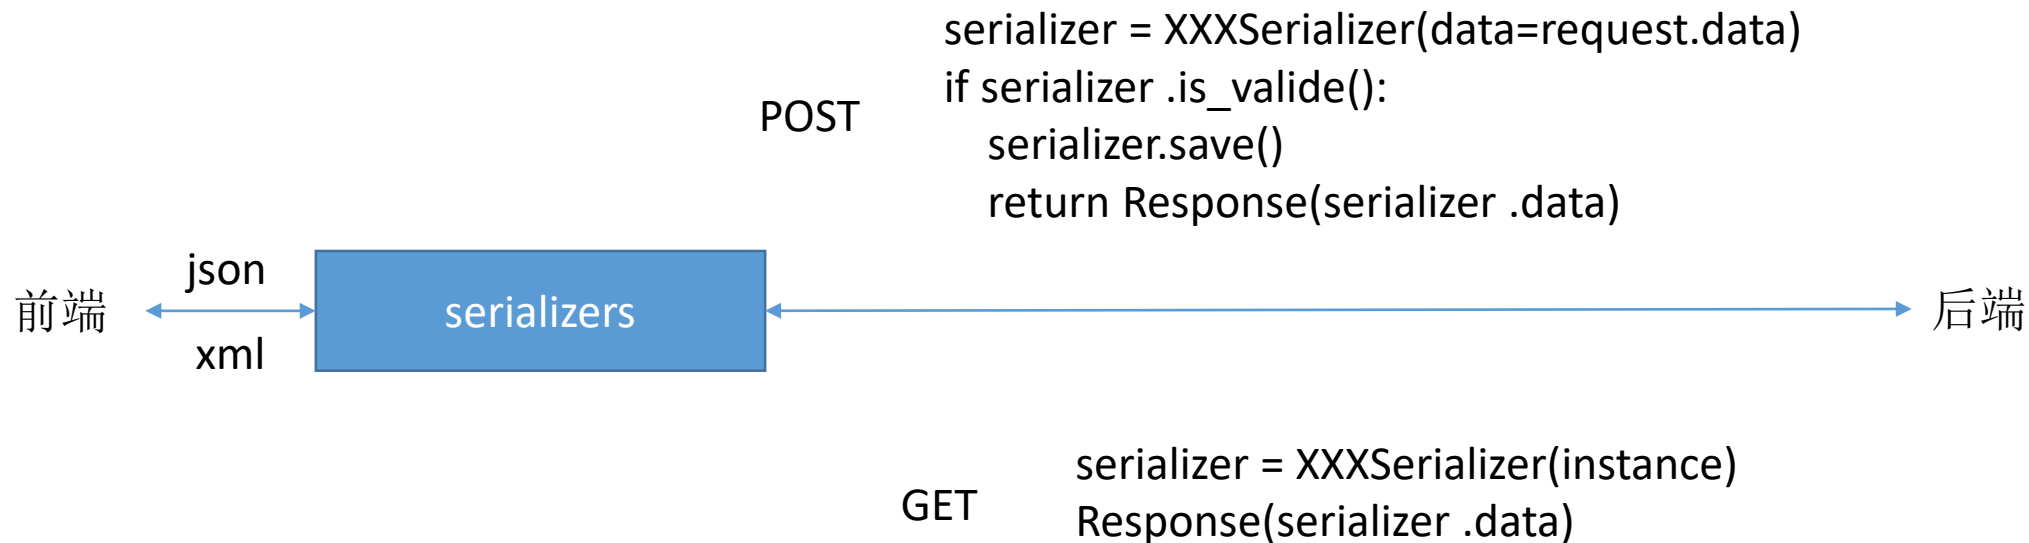

venv
pip
startproject
startapp
Settings
migrate

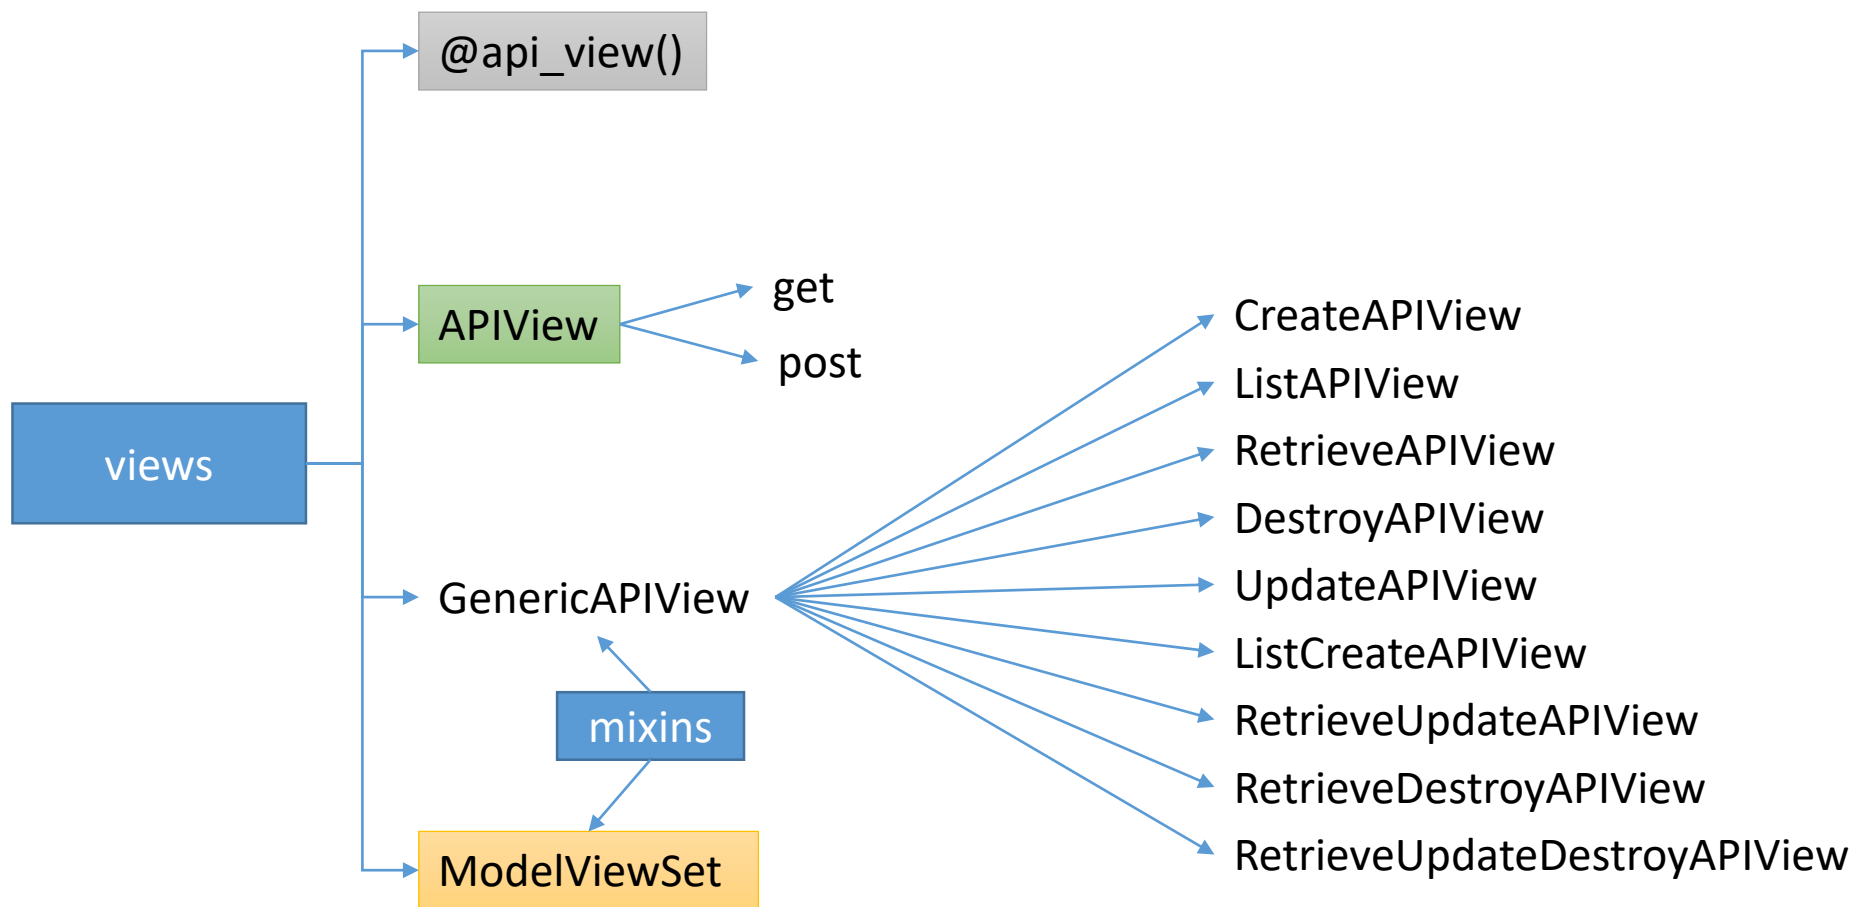

Django REST framework 运行机制

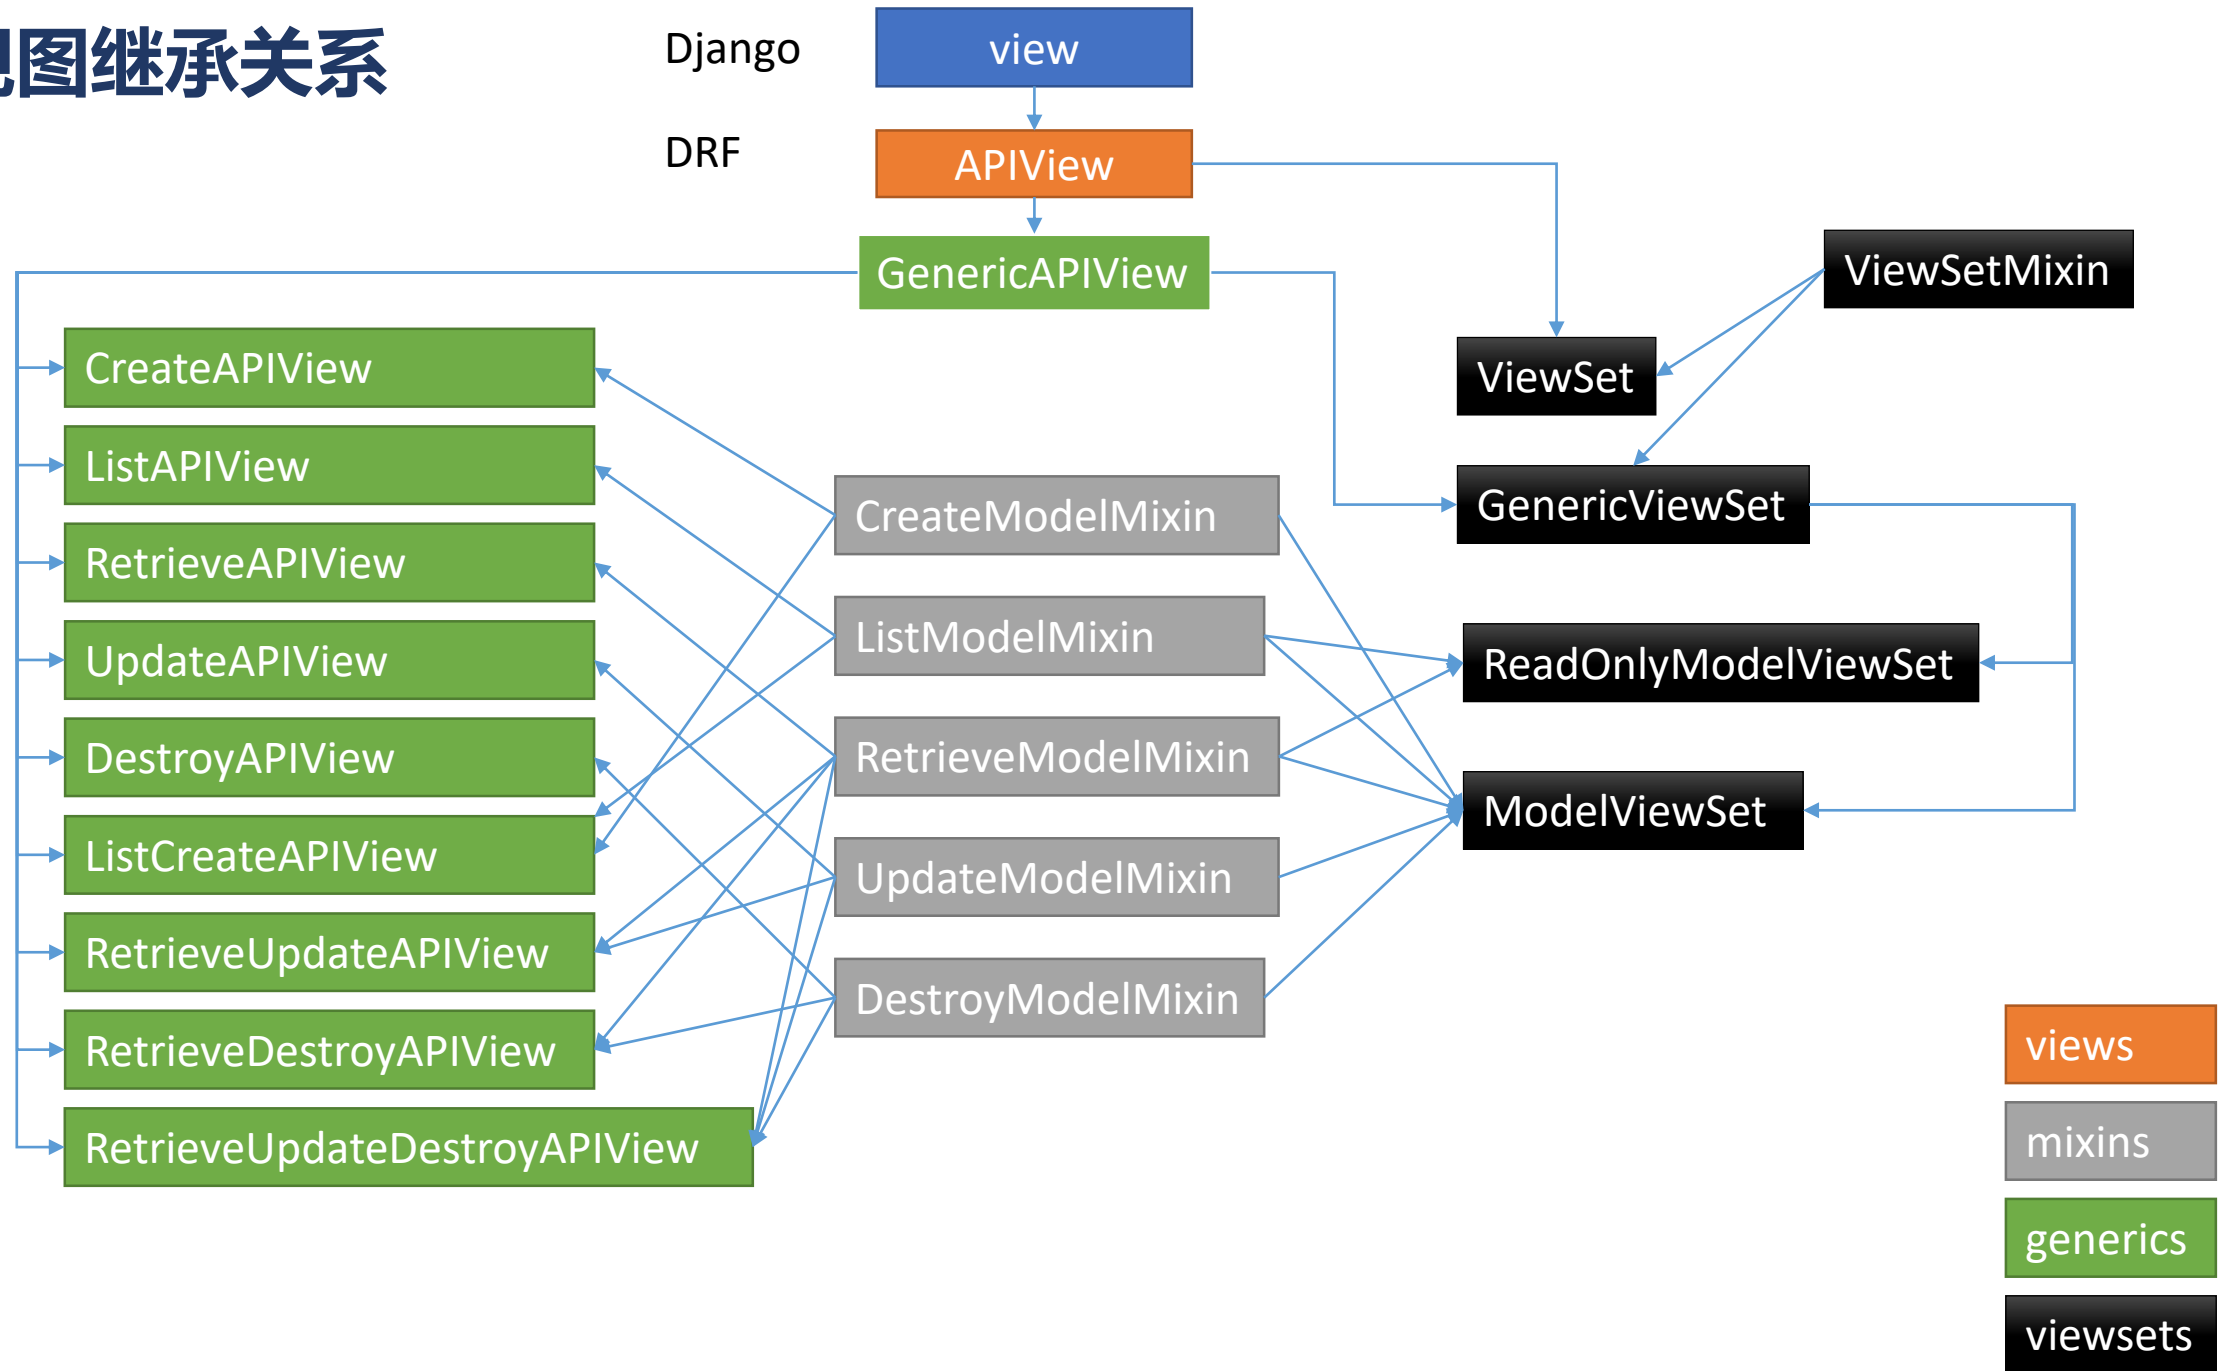

DRF序列化方向

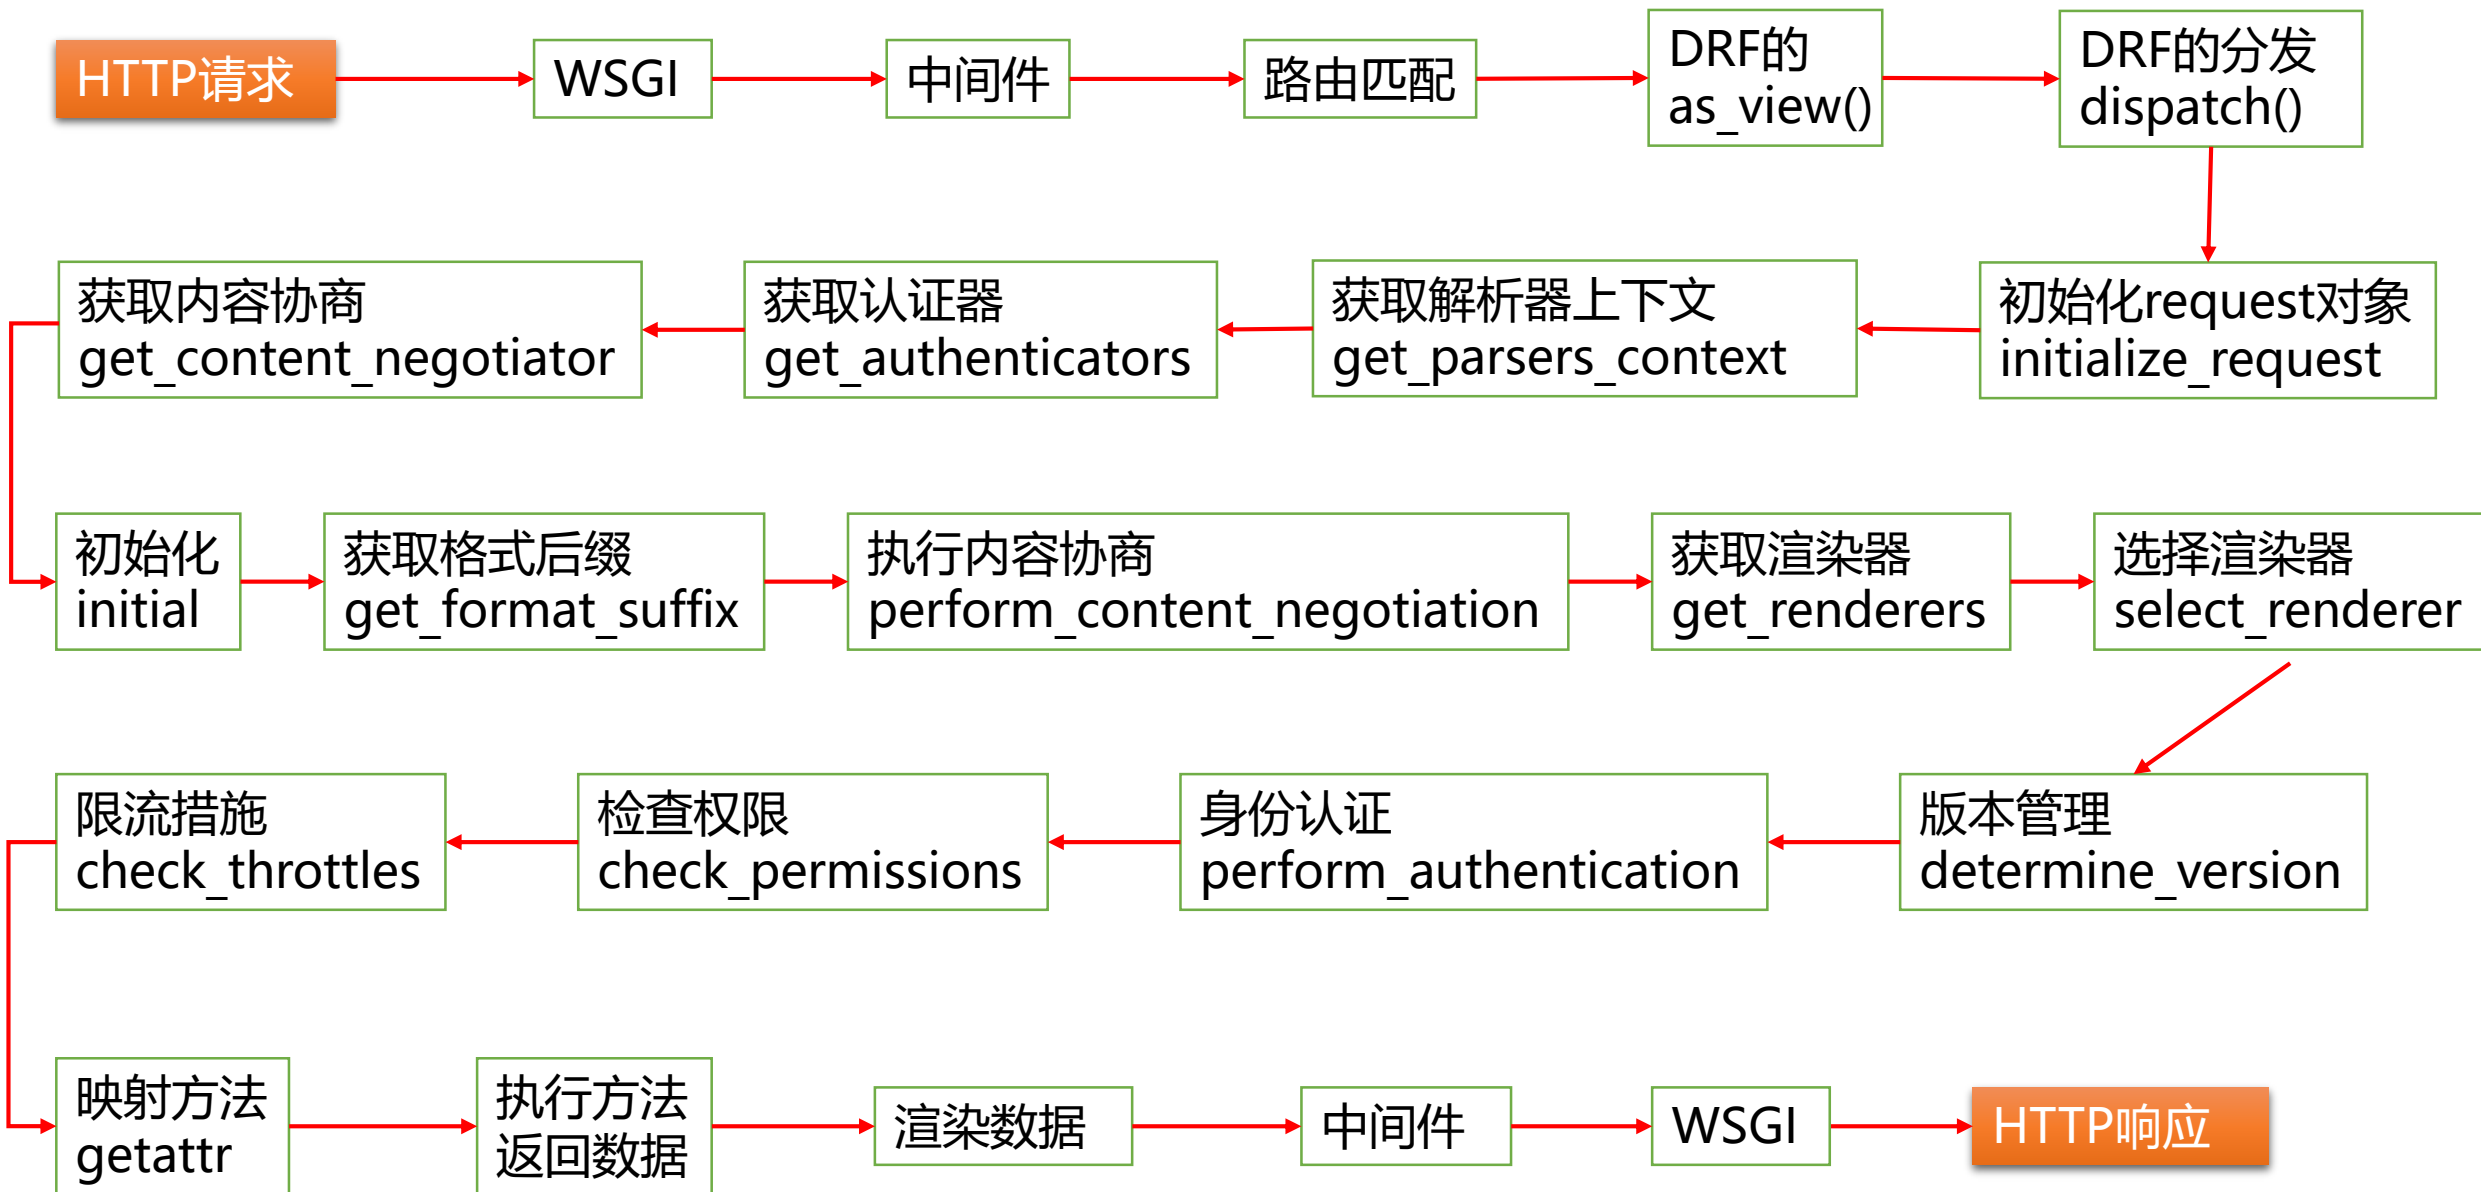

DRF视图

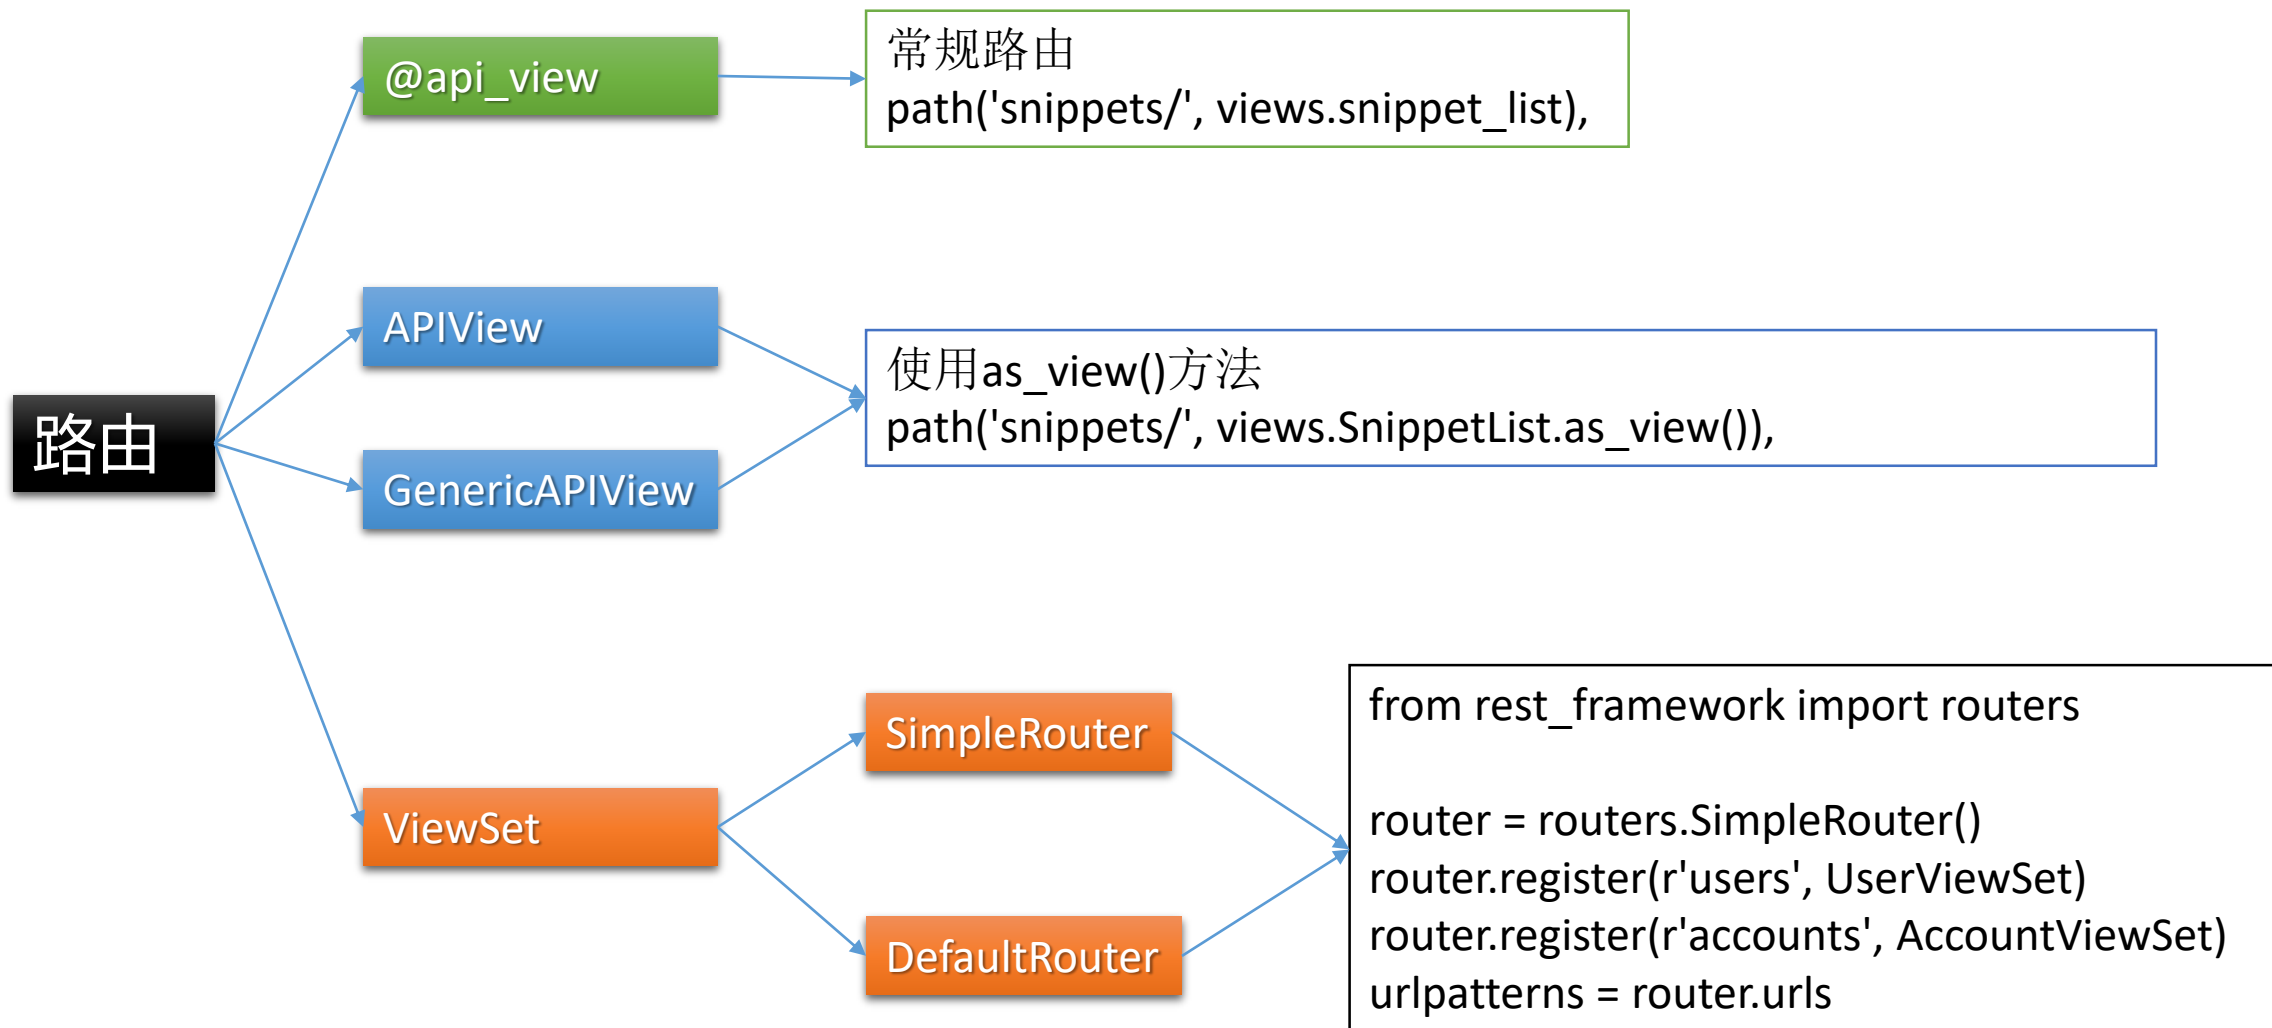

DRF视图继承关系

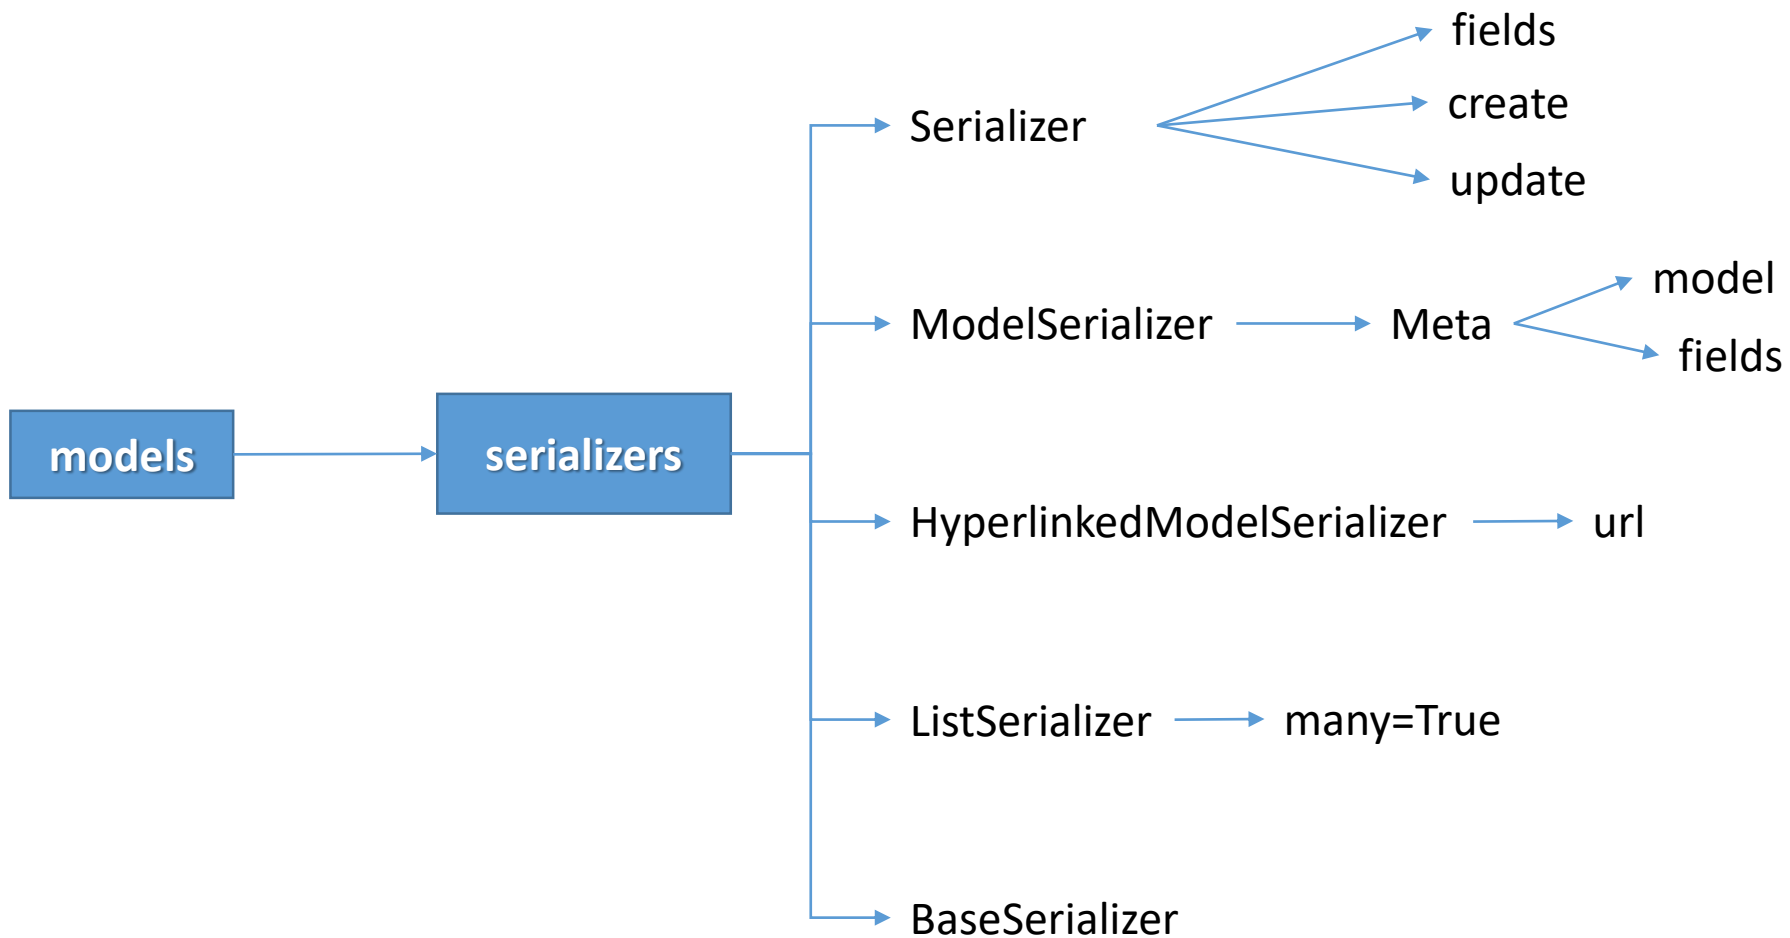

DRF基于APIView视图的源码全流程

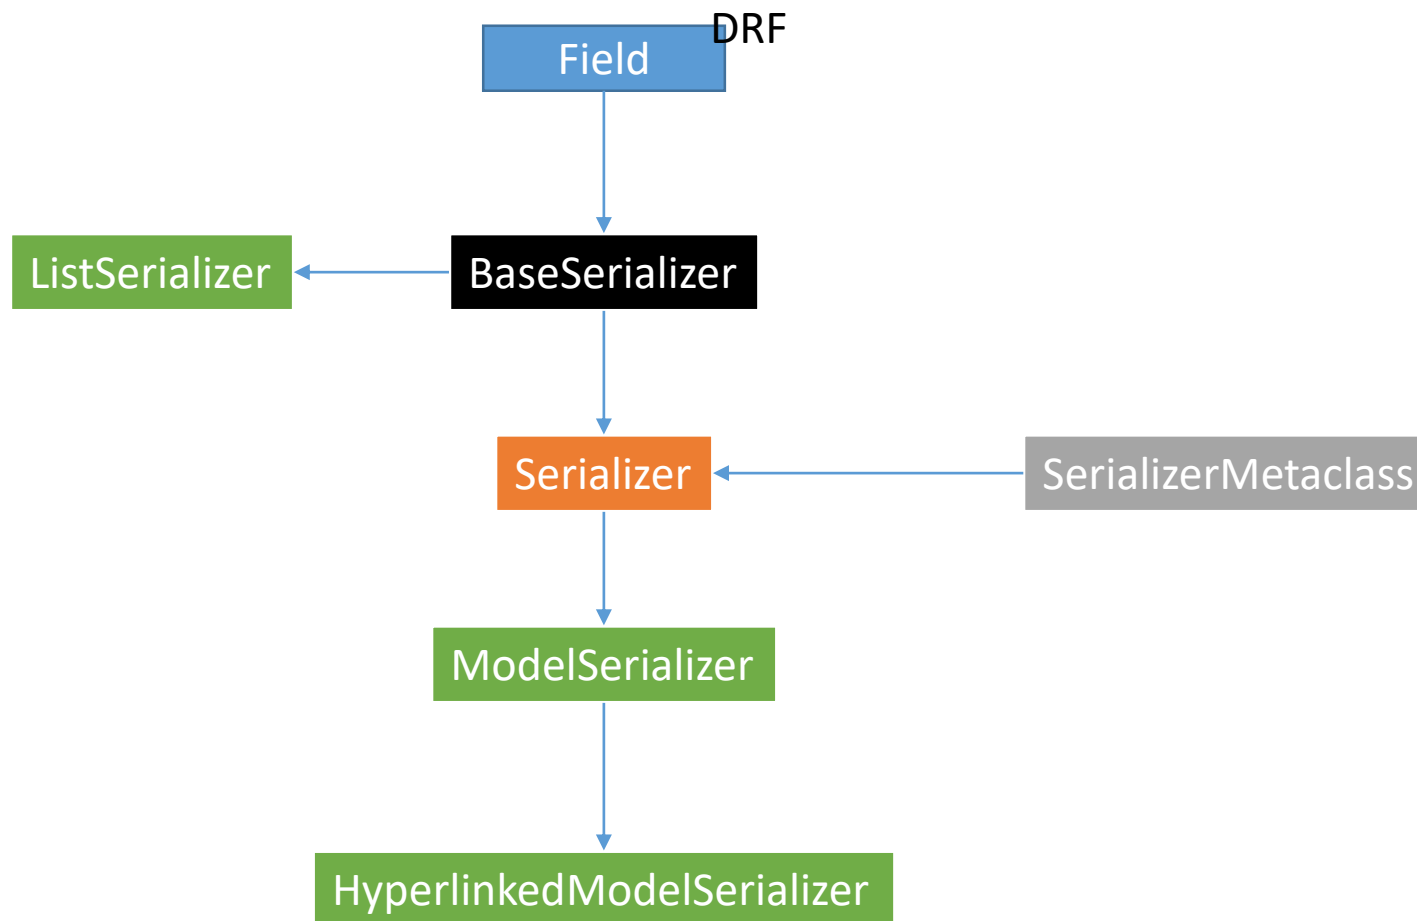

DRF路由编写方法

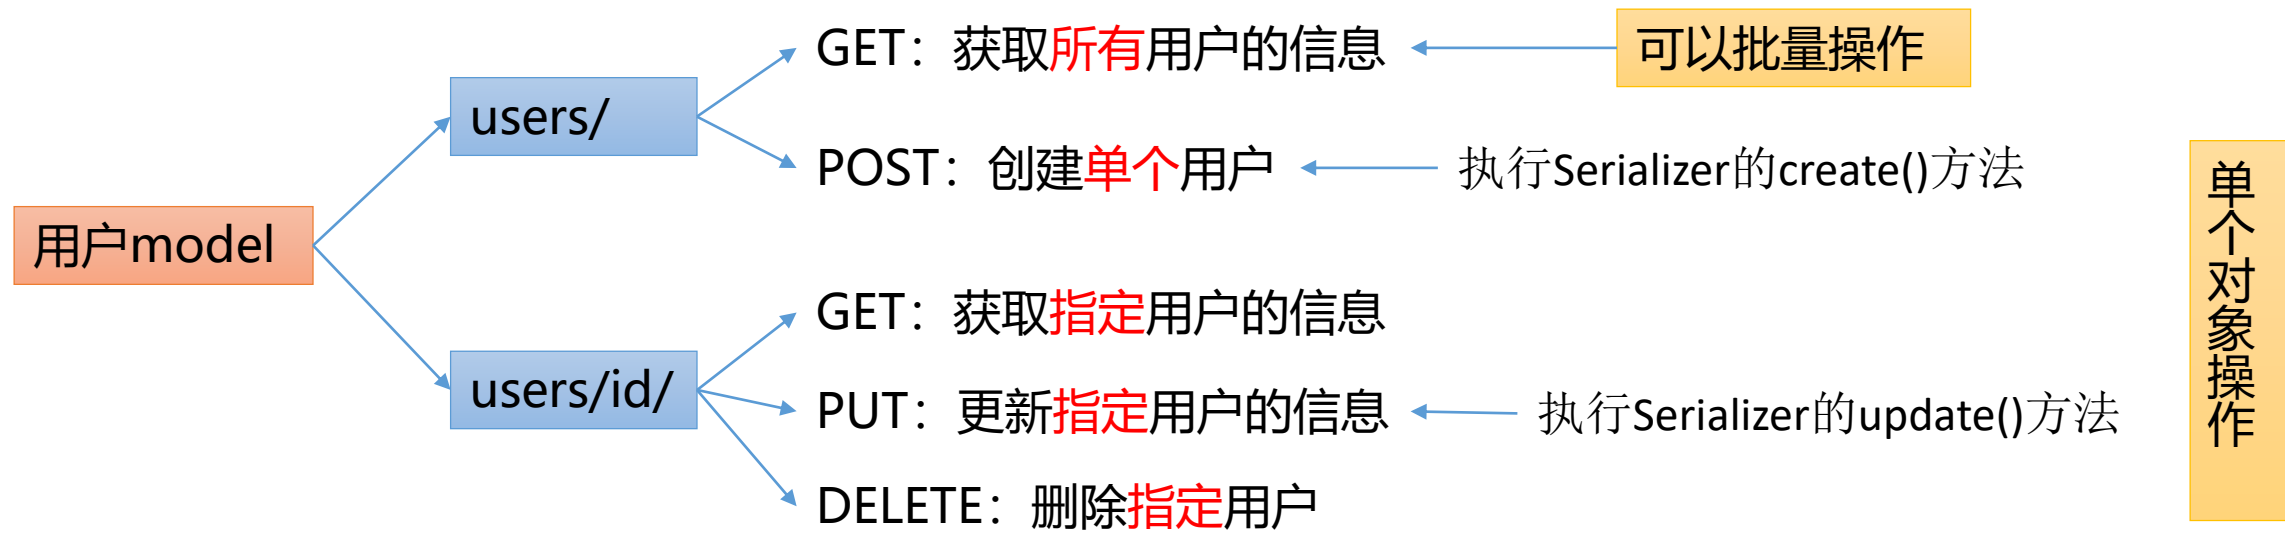

DRF序列化类

DRF序列化类的继承关系

DRF中对于反序列化操作的设定

BaseSerializer
Serializer

is_valid(): 实现
save(): 实现
create(): 占坑, 或简单实现
update(): 占坑, 未实现

ModelSerializer

create(): 简单的实现
update(): 简单的实现

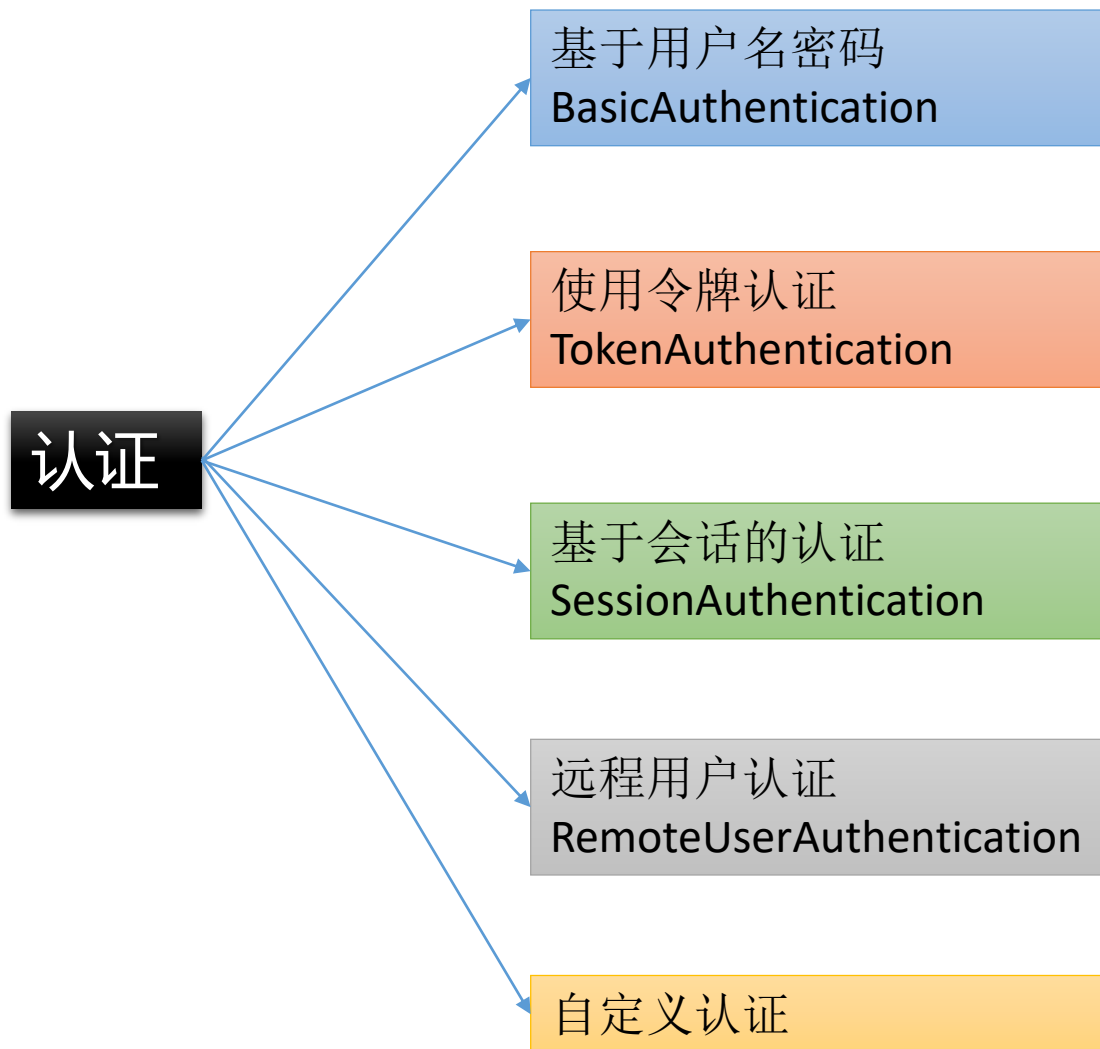

ListSerializer

is_valid(): 实现
save(): 实现
create(): 简单实现
update(): 不支持

HyperlinkedModelSerializer → 就是个弟弟

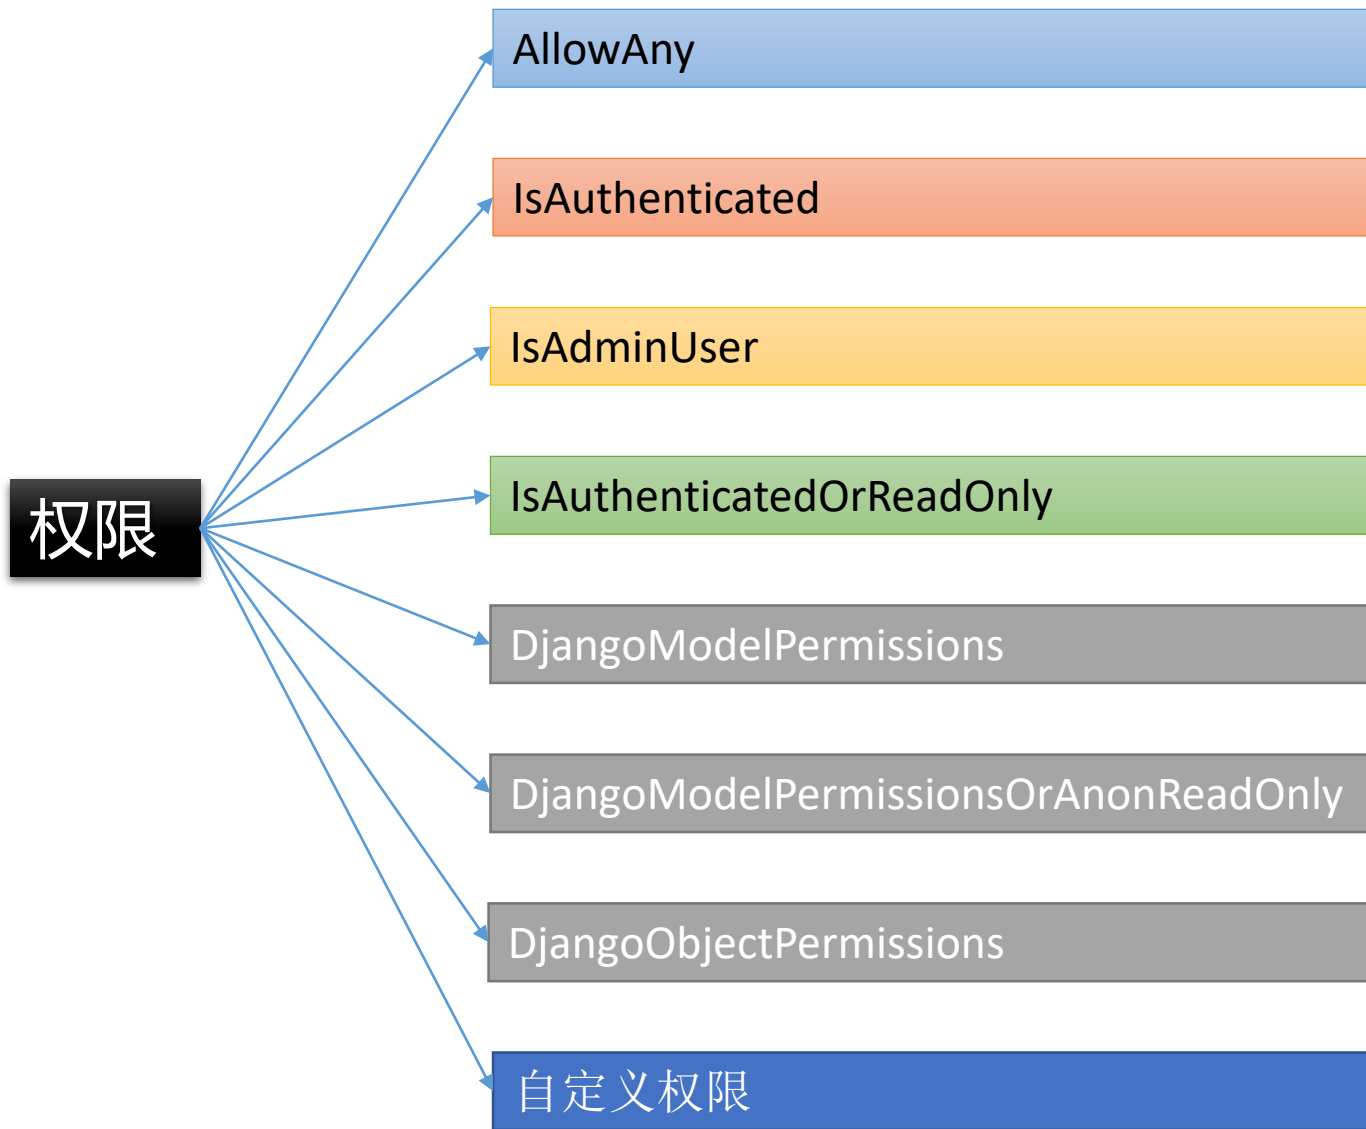

ModelSerializer实现了简单的create和update方法。HyperLinkedModelSerializer则是完全继承ModelSerializer的基础上, 简单的增加了url字段和嵌套逻辑。

DRF的认证

全局性的配置或
对象级别的配置

DRF的权限

全局性的配置或对象级别的配置

DRF的验证器
